Madaba, 17117, Jordan

Computer Science graduate skilled in software development, machine learning, and tools like Linux, Bash, and Python. Experienced in creating scalable solutions, including an NLP chatbot with RAG. Passionate about AI, eager to apply technical expertise in a dynamic growth-focused role.

Work Experience

GIS and IT Networking intern

Sep 2023 - Jan 2024

Miyahuna | Madaba, Jordan

During my internship at Miyahuna, I gained foundational knowledge in network infrastructure, GIS, and IT support. I shadowed professionals, learning about network configuration, troubleshooting, and management tools, which helped solidify my career foundation in computer science.

- Developed a solid foundation for a career in computer science
- Gained foundational knowledge in network infrastructure and Geographic Information Systems (GIS)

Projects

PET MATE APP

Jan 2024 - Jul 2024

PetMate is an innovative platform connecting pet owners with breeders and pet care services. It enables users to manage pets, browse stores, place orders, and communicate with sellers. PetMate offers a user-friendly experience for animal care and breeding.
